A SUIT FOR A MUSIACHE.

DECATUR, ILLINOIS, WEDNESDAY, JUNE 12, 1878.

A young gentleman of Peoria, Ill., us prought suit against a tonsorial artist of that municipality for \$500, which amount, in tawful currency, he claims as indemnity for loss and damage sustained by reason of malpractice, on the part of defendant, the melancholy result of which was the sacrifide of a portion of an incipient mastache, which the plaintiff had thus far reared with tender care and infinite solicitude. We do not know how the court and jury will regard this suit, whether they will treat it with gravity or levity; but a little re-flection will convince even the most thoughtless man that the injured youth has solid ground of complaint. In all ages of the world the hirente adornment of the head and face has been regarded with an interest amounting almost to veneration. The ancient Israelites, the Arab tribes of old and recent times, the Chinese and other Orientals, all shared or share this feeling. The Scriptures, show that the hairs of all heads bre numbered. Whether the plaintiff, in this case, has taken a census of his mustoche, and, in his bill of particulars, harges at a given price per hair, we are not advised. It is likely, however, that his bill is for the entire mustache, for the remaining section cannot be regarded as of much utility. Fractions, in such cases, are of no account. Victims of the careless handling of razors will watch the progress of this case with insrent. - Washington Post.

AN ARKANSAS COW.

The yield of milk from Northern dairy cows is incredible to people in regions where cattle are raised mostly for their beef and hides.

Judge Grant was in Little Rock, Arkansas, in attendance at the United States court. One morning he saw a farmer with a slouch hat and genuine butternut suit, trying to sell a cow in the market there. It was a large, longhorned animal, and the planter was informing a man that the cow would give four quarts of milk a day if well fed. Up stepped the judge. "What do you

ask for the cow?" "About thirty dollars. She'll give five quarts of milk if you feed her well, and he proceeded to describe her good

qualities. Said the Judge. "I have cowe on my farm, not much more than half as big as your cow which give twenty to twenty-five quarts of milk a day."

The planter eyed the judge sharply for a moment, as if trying to remember whether he had ever seen him before or not, and then asked "Stranger, where do you live?

"My home is in lows." Yes, stranger, I don't dispute it. There was heaps of sogers from Iowa down here during the war, and, stranger. they were the all firedest hars in the whole Yankee army. Mebbe you mout be an officer in some of them regi

BERLIN, June 11 .- The condition of Dr. Nobling is so much improved that it is thought likely he will recover. The wenderfully. To-day he celebrated the recognition right off, and would have forty-ninth universary of his marriage. Arrests for treasonable utterances

With this relatively less public attention than th internal crisis, which is kept promiseu ously in view by the activity of the police and the partisan preparation for the approaching election.

BERLIN, June 11.-The leaders of the National Liberal party are here for consultation and to determine on the course of action. They believe Prince Rismarck had determined upon the lissolution of the Reichstag before Nobling attempted to kill the Emperor, or that he would at least have reconvened the Reichstag and ascertained the disposition of that body. Their war cry will be like that of the French republic in the contest with the De Broglie Ministry, the return of present

The congress will be opened by Prince Rismarck as President, by supmitting his memorandum of points or resume of subjects to be treated directly by the plenipotentiaries. The business of the first sitting will be confined to the settlement of the question as to Greece to participate in its transactions. There is a report ourrent that the Bonaparte, Orleans and Bourbon interests are to be privately advocated dur ing the congress by gentlemen deputed for the occasion, the hope being onter tained by the Monarchial parties in France that a conservative reaction

would make the race more complete than Tipton could. The district is strongly Republican, yet Tipton only defeated his Democratic antagooist, Adlai E. Stevenson, two years ago, by a very small majority, and then he carried with him the party strength usually attending a Presidential election. Stevenson will be the only nominee of the the hardest kind of work to defeat him,

EDS. REPUBLICAN - Nothing about your paper has pleased and interested me so Monday, the 24th inst. It depends not much as the opening of the Educational upon mere advance assertion, but upon Column . When on several pecasion Prof Trainer requested and challenged ominions on various school topics, I supdence is, may be gathered from the folposed, of course, the teachers of the lowing notice in that influential and can county would rise en masse to unswer, I did journal, the Cleveland Daily Leader, have been much surprised that they did of a recent date. not If I have correct ideas of a teacher's duty, it is not merely to spend six hours a day in the school-room, but rather to ad vanca adadistion, valdels includes increase of knowledge elevation of good motives, higher and purer amblions, better and kinder social lives, first in the district which pays him, and second in every way which would add to the efficiency of the common schools in general. I have seen no plan which is more likely to bring school questions home to the people than sarpest words snoken in behalf of our common school system through the columns of our home papers. These words from the men and women whose profession is teaching should be candidly and freely spoken .-Let us hear from the rank and file of the Macon county teachers. Meantime may I proffer one auggestion I have spent many years in the school

room, both as pupil and teacher, and owe

much more to the common schools than I

can ever repay. Though now on the retired list, and with an abundance of employment, there is no topic of such interest as school improvement. So since no one classpeaks I give my opinion on the advisability of raising the grade on public examinations for teachers. Thave only given cursory glances at the list of ques tions as printed by the papers, but have no hesitation in saying that at present there should be no increase, cittier in the difficulty of the questions, or in there quired knowledge of the topics which would be needed to answer them I presome the question is suggested because the fact is evident that many poor teach ers hold certificates and the present system of securing, or endeavoring to secure, competent instructors is often eminently unsatisfactory. But I do not think that an increase in the required grade of scholarship would help us at all Many persons are capable of acquiring leads to magnificent some resonce continue the mid air ven throwledge who are utterly incomble of three of Thomas and Chaton Jasper are tomasting it to others. Doubtless in many cases the examiners own private judgment would he of more value in deciding whether a candidate did, or did not, deserve a certificate than would a whole table full of questions fully and completely answered, but no examiner would like the responsibility that such a course would incur were cast, of which John Ullrich received. ANDERSON'S ANTECEDENTS.

A New Orleans correspondent of the Cincinnati Gazette contributes a few interesting items of the rapidly growing fund of reminiscences of Anderson. He says he was universally known among politicians as "Red-headed Jim," and as a man of most uncertain moral character. He says it can be proved that the Democrats gave him \$500 to attend to their interests in the East Felicians election. He also says that Weber was a "brave, true man," which is an additional indication that Anderson forged his name to that joint protest.

The Lancaster (Pa.) Intelligencer (Democratic) says of James E. Anderion that he was, years ago, a resident of that city, and one of Judge Patterson's Sunday-school scholars. He was an apprentice in the Union office, and was discharged therefrom, according to the Intelligencer, "for offering to the Demograts to mix their tickets with those of the Republican party, printed at the Union office." While in Lancaster he was regarded as shrewd and tricky, but by no means brilliant.

"THE two lovers plunged gracefully nto each other's arms across the gate splitting the top rail and breaking both hinges in their frantic demonstration of joy; and the frail structure fell to the ground, a hopetess, chaotic wreck.' Fragment of love story from Pack.

"It is a terrible give-away when a temperance lecturer pausing in his speech to take a drink of water, sets the glass down and lazily reaches out toward the end of the table for a couple of coffee grains," says the lecturer of the Burlington Hawkeye.
